

Arman Hossain

Junior Web Developer

Despite a non-CSE background, I have dedicated the last few years to mastering front-end technologies. My career aspiration is to leverage my self-taught expertise in front-end development, acquired through rigorous self-study and hands-on projects, to contribute innovative solutions and create engaging user experiences in the tech industry.

Project

Portfolio website (Vue.js)

- Developed a responsive portfolio using Vue.js & Tailwind CSS.
- Tailwind CSS for efficient styling, ensuring a clean and maintainable codebase with a focus on creating a visually cohesive and modern design.
- Crafted an intuitive and visually engaging user interface, blending Vue.js interactivity and Tailwind CSS aesthetics to create a seamless and delightful user experience in my portfolio.

Language : Vue.js , Tailwind CSS.

E-commerce website (Vue.js & Tailwind CSS)

- This e-commerce website is fully responsive (Tailwind CSS) and functional (Vue.js).
- I am using the dummy JSON API to show images, text, and numbers.
- I included the compare and card option because anyone can easily compare a product and also add a product to a card.
- Applied the user authentication system.

Language : Vue.js , Tailwind CSS.

E-commerce website (Bootstrap 5 & CSS)

- Designed and built a responsive e-commerce website using Bootstrap 5, emphasizing a sleek and user-friendly interface.
- Implemented advanced frontend techniques to ensure optimal performance on various devices.
- Showcased proficiency in modern web development for an enhanced online shopping experience.

Language: Bootstrap 5 & CSS
